

[We are looking for](#)

Crazy back-end Web Developer

Codefy Software puts in motion the right people, skill sets and technologies to meet your performance objectives and your business needs, assuring support for the entire software development process.

The company offers a unique set of skills and abilities like:

- building enterprise solutions,
- feature-rich custom web applications,
- mobile applications,
- scalable cloud platforms for start-ups and
- complex computer vision applications.

All these having in mind great user experience.

What are we looking for?

- Front-end skills in JavaScript and TypeScript to build awesome AngularJS 2.0, jQuery apps
- Backend skills in PHP, .NET and NodeJS
- Data storage technologies like MySQL, SQL Server, MongoDB, Redis, Cassandra, but open to novelty.
- An interest in scalable DevOps cloud platforms like AWS and Azure
- Creative and structured approach to software development
- Ready to combine the old with the new for high quality solutions
- Problem solving with an eye for clean and maintainable code

What's in for you?

- Attractive package and flexible working conditions
- Actively participate in all phases of the software development life-cycle
- Join a dynamic team willing to support you all the way
- Excellent coffee and cookies
